Learning and Teaching Techniques of the Course	On the Job Learning, Reporting, Communication, Group Work

Course Objective
The activities in the workplace experience course will enable candidates to become experienced workers with many skills. Students will be evaluated by experienced experts and collaborating faculty members in learning their future professions and gaining competency in this field.

Learning Outcomes

1. Students grow according to the needs of the market by working in natural laboratories in the market instead of artificial laboratories in the school environment
2. Evaluating the practical results of the theoretical knowledge learned at university.
3. Accessing special resources related to the field using many databases.
4. Presenting the information obtained in an official report.

Course Outline

Students gain experience by observing at work one day a week. Students take classes at work instead of school. In this course, vocational candidates have the opportunity to work individually and observe them, even if their duties and activities are limited to their experienced supervisors and trainers.
